

To the Citizens of Hickman County

Trash and Large Item Disposal related to the flooding this past weekend (Aug. 21st, 2021) :

Any household trash which can be bagged up can be taken as normal to any of the Convenience Centers located throughout the County which were affected by the flood from this past weekend!

We are currently working on a temporary debris staging area for large items destroyed in the flood such as furniture, appliances, and demolition debris. We are working with the state to get approval for this area as quickly as possible and will keep you posted when it is approved.

Until that temporary debris staging area is approved, please move those large items to curbside and they will be dealt with later.

If you have already taken large items to the Centerville Landfill and were charged for those materials, please keep your receipts as this may be reimbursable thru FEMA. (This is only for items related to the flooding in the Pinewood and other related areas this past weekend (Aug. 21st, 2021!))

Respectfully,

Solid Waste & Hickman Co. Government
